NEW SOUTH WALES

STATISTICAL REGISTER.

1930-31.

PREFACE.

THE seven sectional parts of this volume which include the "Statistical Review Since the Year 1856," last published in the 1925-26 issue, have already been issued separately, and are now presented collectively, accompanied by a General Index covering the subjects treated. Every care has been taken to keep the work free from errors but if any have escaped detection it would be deemed a favour if their nature were indicated.

The figures should be read in conjunction with the "Official Year Book of New South Wales."

The Government Statistician wishes to express his thanks to the Commonwealth Statistician, to the responsible officers of the various State and Commonwealth Departments, and to others, who have kindly supplied all desired information, often at considerable trouble.

Bureau of Statistics,
Sydney, 22nd December, 1932.

No. 16—Imports Oversea, 1930–1931.

(From 1st July, 1930, to 30th June, 1931.)

NOTE.—With the exception of Great Britain and Northern Ireland, Irish Free State, and New Zealand, and in cases where a single country is concerned, only those countries are shown under each article where the value of import exceeds £500. Particulars in the following table refer to "Country of Origin"; details of country of direct shipment are not available.

Value of Imports.—The value of all goods imported from countries beyond the Commonwealth represents the amount on which Duty is payable or would be payable if the Duty were *ad valorem*.

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where imports have been declared in packages without an indication of the number, capacity, or weight of the articles imported, only the values have been inserted.
N.E.I. means "Not elsewhere included."

Import Duties.—Duties charged on Imports into New South Wales are collected under the Commonwealth of Australia Customs Act, 1901–1930; the Customs Tariff, 1921–1931; Customs Tariff (New Zealand Preference) 1922–1928; Canadian Preference Tariff, 1925; Customs Tariff (Papua and New Guinea Preference) 1926.

Where reference has been made by footnote against any article in this table, fuller details may be obtained on reference to the Customs Statistical Classification.

Total Imports, Oversea, 1930–31, £26,311,260. **Gross Duty Received, £9,544,358.**

[No. 17.—Exports Oversea, 1930-31.

Note.—With the exception of Great Britain and Northern Ireland, Irish Free State, and New Zealand, and in cases where a single country is concerned, only those countries are shown under each article where the value of the export exceeded £250.

The difference between the value of Australian produce exported and the total export represents the value of produce of oversea origin, re-exported.

Value of Exports.—The value of goods exported is, generally, the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term, except for the following commodities concerning which an alteration in the method of valuation of exports was made as from the 1st July, 1930, as follows:—Sugar—the value f.o.b. at which sold to overseas buyers; Butter—the current market value less the amount paid as export bonus; Goods on which bounty or rebate is paid—the value in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From the 1st July, 1930, the following basis of valuation was adopted for exports of wool, viz:—Wool sold in Australia—the actual price paid plus the cost of services incurred in placing the wool on board ship; wool shipped on consignment—the f.o.b. equivalent on ruling prices.

Exports—Australian Produce.—Articles which were partly or entirely manufactured from imported materials are shown under this heading. The Commonwealth Customs Department does not now distinguish between the produce of New South Wales and that of other States, the whole being classified as "Australian."

Quantities.—Generally, though not invariably, quantities have been shown in the ordinary trade unit. Where exports were declared in packages without an indication of the number, capacity, or weight of the articles exported, only the values have been inserted.

N.E.I.—Means "Not elsewhere included."

Ships' Stores.—Goods shipped as ships' stores on board oversea ships have not been included in exports. For ships' stores, see Table No. 18.

No. 44—Harbour and Wharfage Rates, 1931.

Harbour and Wharfage Rates in the port of Sydney are collected by the Sydney Harbour Trust and in other ports by the Department of Navigation of New South Wales. Inward rates are payable in respect of goods brought by sea for landing, and outward rates on goods shipped on a vessel. Special inward rates are prescribed for certain articles produced and shipped within the Commonwealth, and the inward rates for other goods are those shown under the heading of General Rates. At ports other than Sydney separate schedules of rates apply to coastwise goods. In Sydney Harbour outward rates are not levied on any consignment under 5 cwts. or 10 cubic feet. Goods transhipped are subject to transhipment rates, and not to inward or outward harbour or wharfage rates. Passengers' luggage is exempt.

Storage Charges are imposed on goods left on a wharf beyond a prescribed time, unless the wharf is held under lease. The free period for inward goods in Sydney is six days after the final discharge of a vessel; at other ports it is two days. The rates per day in Sydney are 4d. per ton during first week, 5d. during second week, 6d. during third week, and 7d. thereafter. In other ports the rates are 2d., 3d., 4d., and 6d. respectively. The charges for storing timber after two days are at the rate per day of 1d. per ton during first four days; thereafter 3d. in Sydney and 2d. in other ports. At Newcastle the storage charge on wheat and wool after the first two days is 1d. per ton per day.

(See Table 21.)

NOTE.—The difference between the actual Loan Expenditure stated below and the Public Debt, as shown in No. 22, and following tables, is due to the fact that the outstanding debt represents the gross amount sold, while the expenditure is the net amount after deducting discount and expenses of flotation and allowing for debit balance of Loan Account.

No. 21.—Distribution of Total Loan Expenditure to 30th June, 1931.*

NOTE.—The total loan expenditure has no necessary relation to the public debt, although at times the amounts are approximately the same. The former is continually increasing according to the amount of loan moneys spent annually, while the public debt outstanding may be either reduced by the redemption of loans from revenue or increased by the issue of new loans, and may include large sums in hand.

No. 23.—Funded Debt*—Amount Authorised, Sold, Redeemed, and Outstanding, 1900–1931.

NOTE.—The difference between the amounts outstanding at the close of each year does not, as a rule, represent the actual increase or decrease in the Debt. Repayments of loans are generally effected under the head of renewals, and in following out this practice, it is usually found necessary to float the redeeming loan some time before the due date of the maturing loan; hence the liability appears twice in the Debt Statement till the bonds or stocks are retired.

* See note * to table 22. Exclusive of payments of interest on account of Trust Funds and Special Deposits held by the Government, and on Closer Settlement Debentures. § Total Public Debt.

London Agents.—Operations connected with the issue and inscription of Stock are conducted by the Bank of England and the London and Westminster Bank. The former charges ¼ per cent. per £100 Stock on all loan issues, and £350 per million annually for the inscription and management of Stock including the payment of the half-yearly dividends, while the latter charges ¼ per cent. and £150 per million respectively for similar services.

Local Agents.—The Bank of New South Wales and the Commercial Banking Company of Sydney, Limited, transact all Government banking business. The former acts as Financial Agent for the State in Victoria, and also undertakes the payment of the half-yearly dividends on Local Debentures and Funded Stock. The Treasury, however, in local loan issues, directly conducts the operations connected with the issue of New South Wales Funded Stock and Treasury Bills.

No. 25—Public Debt*, 30th June, 1931—Annual Liability of the State for Redemption of Loans.

NOTE.—The latest due dates have been given in this table, but in some cases the loans are redeemable earlier, subject to the Government giving notice to that effect, at periods ranging from 3 to 12 months.

* As at 31st December. † Deposits as at 30th June. ¶ This column represents the total amount of Savings and Trading Banks Deposits, less deposits of Savings Banks in the Trading Banks.

‡ NOTE.—In the above table "Number of Accounts" in Savings Banks is quoted exclusive of those shown below (*i.e.*, small Balance Accounts, which are not really representative Savings Accounts), but amounts at balance thereof have been included in "Deposits." In calculating "Amount per Account," both number and amount at credit of small Balance Accounts have been excluded, whilst calculation of "Per Head of Population" is based upon the total of all deposits.

* Information not supplied in all cases.

Amount of Consideration.—Many mortgages do not state the amount lent under them, and many discharges do not disclose the amount received in consideration. The figures representing "Amount of Consideration" under both these heads are therefore considerably less than the amounts actually advanced or repaid.

Sums secured by Lien on Wool and by Mortgage of Sheep.—When any sum has been secured, both by a lien on the wool and by a mortgage of the sheep, the amount is included under both heads.

In 1929 the gross amount lent on liens was £2,695,679, in 1930 £3,279,949, and in 1931 £3,568,911; but from these amounts has to be deducted the sum of £1,191,693 in 1929, £1,311,597 in 1930, and £863,286 in 1931, secured both by lien on the wool and mortgage on the sheep so that the net amount lent on lien was £1,503,986, £1,968,352 and £2,705,625, in the respective years.

Mortgages on Wool and Crops discharged.—Liens on wool and on growing crops mature at the end of each season, and terminate without formal discharge. During 1929 there were 114, during 1930, 73, and during 1931 there were 88 formal discharges of wool liens registered, representing £158,728 in 1929, £52,318 in 1930, and £55,715 in 1931.

NOTE.—Many mortgages of Stock come to an end without formal discharge.

Assurance Fund.—To provide compensation to persons who, through error, may have been deprived of their properties, an Assurance Fund has been created by a contribution of one half-penny in the pound levied on the declared capital value of land brought under the Real Property Act. On 10th September, 1906, the amount at credit of the Assurance Fund under the Real Property Act, viz. £255,058 14s. 1d. was transferred to the Closer Settlement Fund established by the Public Works and Closer Settlement Funds Act of 1906.

No. 82.—Number and Value of Estates of Deceased Persons, and Settlements, classified —year ended 30th June, 1931.

NOTE.—The rates of duty quoted were imposed under the Stamp Duties Act, 1920, which came into force on the 1st January, 1921. Half rates are charged if the property passes to the widow or to any children under 21 years of age, if the total net value of the estate is under £5,000.

* Excludes Federal Capital Territory.

No. 88.—Municipalities—Valuations and Rates for year ended 31st December, 1930.

NOTE.—In this table the *Unimproved Capital Value* is the amount which the fee-simple estate in such land is worth under such reasonable conditions as a *bona-fide* seller would require, assuming the actual improvements had not been made.
The *Improved Capital Value* is the amount which the fee-simple estate of the land is worth, with all improvements and buildings thereon.
The *Assessed Annual Value* is nine-tenths of the fair average rental of land with improvements thereon.

Religious Instruction.—Under the Public Instruction Act (43 Vic. No. 23), which came into force on 1st May, 1880, it is provided that the instruction imparted at Public Schools must be absolutely unsectarian. "Secular instruction" is defined by the Act as including "general religious teaching as distinguished from dogmatical or polemical theology." Provision is made for authorised teachers of any denomination to give religious instruction at specified hours to the scholars belonging to their religion, and separate class rooms are provided generally for this purpose. The total number of visits paid to State schools during 1930 by authorised teachers was 118,107, namely ;—Church of England 53,560 ; Roman Catholic, 4,300 ; Presbyterian, 19,887 ; Methodist, 26,131 ; other Denominations, 14,229.

Subsidised Schools.—Subsidies are granted only in the case of children resident in thinly-populated country districts, so far removed from any Public School that attendance is impracticable. The conditions are that where a private teacher is engaged by two or more families in combination, or by a single family with not less than three children of school age, such teacher, if approved by the Minister, may be paid subsidy as follows :—

"In the Eastern portion of the State at a minimum rate of £30 per annum, based on the average monthly attendance, such aid not to exceed £70 yearly. In the Western section the minimum and maximum rates per annum are £33 and £80 respectively. The Western portion of the State consists of that area within which living allowances are granted to Officers under the Public Service Board."

Superior Public Schools.—In addition to the above Superior Public (Day Continuation) Schools, established in 1912, composite courses were introduced into Country Schools in 1920 and have a definite aim. Course A leading to the Intermediate Certificate, Course B to the Commercial Superior Public School Certificate, while Course C qualifies pupils for the Public Service Entrance Examination.

These courses meet a distinct demand for the super-primary education of children attending schools in more or less sparsely-populated localities. The number of schools engaged in this work at the end of 1930 was 1,043, having an effective enrolment of 5,001 post-primary pupils, with an average attendance of 4,196.

The Teachers' College, Sydney, provides various courses preparing students for positions as rural school teachers, primary kindergarten, and secondary school assistant teachers. Courses range from twelve months—for rural school teachers—to three and four year courses, leading to graduation in Arts or Science. In addition to academic work at the College, students are given practical work in the Demonstration Schools at Blackfriars, North Newtown, and Darlington, and at selected supplementary practice schools. The number of volumes in the College Library is 37,360.

The Teachers' College at Armidale was established in February, 1928, with the object of training country pupils. The course extends over two years only. In 1930 the enrolment consisted of 104 first year and 65 second year pupils.

WAGES.

No. 79.—Rates of Wages in Various Industries, 31st December, 1931.

The Minimum Rates of Wages, as shown in the following tables, have been fixed by awards of the Court of Industrial Arbitration and of the Industrial Boards of New South Wales, or, in the case of a few industries, by awards or agreements under the Commonwealth Conciliation and Arbitration Acts. In relation to certain occupations which do not come within the scope of any industrial award, average rates have been stated.

The rates relate to the Metropolitan district except in the following cases:—The mining and shipping industries, agricultural and pastoral pursuits, and several important works situated in country districts, for which special awards have been made, viz., the Portland Cement Works, the Lithgow Iron Works, and the Newcastle Steel Works. The living wage in N.S.W. was declared on 7th September, 1923, at 82s. per week for men, and 41s. 6d. per week for women, and these rates prevailed until the 24th August, 1925, when the living wage was raised to 84s. per week for males, and 42s. 6d. per week for females. On the 15th December, 1926, the Industrial Commission declared a living wage of 84s. per week for males. On 27th June, 1927, the living wage was raised to 85s. per week for males, and 46s. per week for females. On 20th December, 1929, the living wage was reduced to 82/6 per week for males, and 44/6 for females. An Act to remove persons employed in rural industries from the operation of the Industrial Arbitration Acts was passed on 17th December, 1929.

Hours of Work.—The Forty-four Hours Week Act came into force on the 4th January, 1926, and the forty-four hour week was in operation in practically all industries until the passing of the Industrial Arbitration (Eight Hours) Amendment Act, No. 22 of 1930, on 16th June, 1930. This Act repealed the Forty-four Hours Week Acts, and provided that the hours of work in all industries other than coal mining, with certain exceptions, should be 48 per week. The hours of work per week were reduced to 44 by the Industrial Arbitration (Eight Hours) Further Amendment Act, No. 53 of 1930, which came into force on 5th January, 1931, and amended Act No. 22 of 1930. The number of working hours per week in the different industries at the 31st December, 1931, is shown in each case.

During the current year, 1931–32, the Unemployment Relief Tax Act, 1931, has been in operation in this State. This Act provides for a tax of 1s. in the £ on income, except where the rate is less than £2 per week or £100 per annum.

* Rates reduced by 8⅓ per cent. for the financial year 1930–31 under the provisions of the Public Service (Salaries Reduction) Act, 1930, and of Act No. 29, 1931. The reduction at this rate is being continued during the current year 1931–32 in respect of salaries not exceeding the living wage, and the higher salaries have been reduced according to a scale in which the rates range from 15 per cent. on the part of a salary which exceeds £200 per annum to 32½ per cent. on the part over £500. There are saving clauses in respect of officers with dependants.

NOTE.—Particulars include estates administered by the Public Trustee.

Gross and Net Value of Estates.—The figures from the Probate Court and from the Stamp Duties Department (see Part "Public Finance") relating to transactions in the estates of deceased persons do not agree. The Court gives the gross value of the estates, and includes those estates which, after investigation, are found not to be subject to duty. The number of petitions is also swollen by probates and letters of administration on some estates being taken out a second time. The amount given by the Stamp Duties Department represents the net value of the estates.

No. 48.—Prospecting Votes, 1921-31.

Prospecting Vote.—The sum of £7,000 was voted for prospecting for gold in 1878; and in subsequent years, at irregular intervals further small sums were voted and expended. In accordance with a resolution of Parliament, an amount has been voted each year since 1887, during which year it was confined to searching for gold. In the succeeding year the conditions were amended so as to embrace all minerals.

NOTE.—This table does not include iron made from scrap, valued, at 31st December, 1931, at £1,416,030; lime, valued at £1,676,189; Portland cement, valued at £18,891,712 and coke valued at £14,642,794, respectively. Emeralds and turquoises have been found in small quantities, but no information is obtainable as to their value.

These figures represent the value of minerals won during the year, and therefore differ from those in Tables Nos. 66 and 68, which show the value (at the mines, and before treatment) of the output from mines in operation during the year.

* Includes all quarries from 1925. Prior to 1925, only those held under mining title were included. † Value at Standard Rates.

NOTE.—The above prices for sheep represent the averages for all sheep, whether shorn or woolly, but as a general rule in January and February the fat sheep at market are shorn; during March and April they have growing fleece; from May to August they are woolly and in September October, November, and December they comprise both shorn and woolly.

†† Exclusive of 238 acres of land resumed.

Surrenders, Exchanges, and Road Resumptions.—Surrenders and exchanges are effected under Sections 195, 196, 197 of the Crown Lands Consolidation Act, 1913, and Road Resumptions are treated under the Public Roads Act, 1902. As land is exchanged for land without ny monetary consideration the extent of the area of Crown Lands is not thereby affected.

Resumptions and Purchases.—The total alienations represent the gross area, no allowance being made for the gifts of land and the resumptions and direct purchases made from private owners on behalf of the various Departments; for particulars of which see Table No. 55.

*The returns for 1920 and succeeding years include holdings over 1 acre in extent on which improvements had been effected, and upon which agricultural or pastoral activities were conducted. Prior to 1920 many holdings, nearly all from 1 to 5 acres in extent were included, which were not used for agricultural or pastoral purposes.

† Particulars of area cultivated will be found in Table 1 of Section I, Primary Production.

‡ The definition of Unimproved Capital Value and Improved Capital Value will be found on page 190, of Part II, relating to Local Government.

NOTE.—Information not available for years 1916–17, 1922–23, 1923–24, 1925–26, 1926–27, 1927–28, 1928–29, 1930–31.

* From the year 1919–20 the returns were collected from holdings over one acre in extent on which improvements had been effected, and upon which agricultural or pastoral activities were conducted; in that they covered all lands, particulars of which serve a practical purpose. In previous years many holdings, nearly all from 1 to 5 acres in extent were included, which were not used for agricultural or pastoral purposes.

Section III.—METEOROLOGY.

The Tables in this Part have been compiled from particulars furnished by the Commonwealth Meteorologist.

No. 91.—Barometric Observations, Sydney, 1931.

Time Ball.—The Time Ball at the Sydney Observatory is dropped every day at 1 p.m. Standard Time. The Time Ball at Newcastle is controlled by signals from the Sydney Observatory.

Standard Time.—The mean time of the 150th meridian of longitude east of Greenwich, England, is the Standard Time throughout New South Wales, with the exception of the area within the Municipal District of Broken Hill and the Electorate of Sturt, for which the mean time of the 135th meridian of east longitude is adopted.

Position of Sydney Observatory.—Latitude, 33° 51′ 41·1″ south; longitude, 151° 12′ 23·10″ east; altitude, 138 feet.

Month.	Self-registering Barograph, corrected to 32° Fah. and Standard Gravity at Lat. 45°, but not to Mean Sea-level. Height above mean sea level:—138 feet.						Mean Height of Standard Barometer, corrected to 32° Fah. Gravity and Mean Sea-level.

Thermometers.—Up till April, 1917, the thermometers were exposed in a shed 11 feet square, of which the sides were 5 feet 6 inches high, and enclosed to within about 30 inches of the ground with open lattice work. The roof was conical, rising to 13 feet above the ground, and was covered with louvres close enough to keep out rain. From April, 1917, the thermometers have been exposed in a standard Stevenson screen.

NOTE.—The above table shows the ratio of actual to normal rainfall each month, the normal rainfall being the average over a long period of years.

No. 104.—Meteorological Conditions, New South Wales, 1931.

The rainfall of 1931 was unusually bountiful throughout New South Wales, except in a small area in the Monaro district. Generally the season was one of the best on record.

The rains of the autumn and early winter months, however, caused heavy floods in inland rivers. In some districts sowing of crops was hindered but favourable seasonal conditions produced heavy yields. Pastures and stocks were in good condition throughout the year.

Tropical influences persisted throughout the winter, and were in marked evidence in the autumn and spring months.

Floods.—In February record floods were experienced on the Richmond and Tweed Rivers. At Murwillumbah the Tweed River broke its banks on the 5th and rose 7 feet over the town bridge. Lismore reported the highest flood on record, and throughout the district great and extensive damage was done.

On the 15th March a heavy flood occurred at Gosford, and on the 10th of the same month a cloud-burst at Ardlethan flooded the town and the water rose to 6 feet deep in some streets.

In April floods occurred in coastal rivers, which caused the loss of several lives.

Torrential rains from March to June caused extensive floods in the Riverina, south-west and central portions of the State.

Cyclonic rains in July caused floods in the Hawkesbury and Hunter Rivers.

Temperature.—The hottest months were February and the latter half of December. The last week of the year was marked by a severe heat wave in the western and southern parts of the State.

The winter was very mild and frosts much less severe than usual. The autumn and spring months, however, were very changeable.

A snowstorm occurred on the 4th September, when the heaviest fall for many years was experienced in the Bowral, Mittagong and Moss Vale districts, extending to the Blue Mountains. On the 12th July a heavy snow storm extended as far west as Orange and Carcoar, and northward to Guyra.

The highest shade temperatures reported during the year was 113 degrees at White Cliffs on 29th and 30th December, and the lowest, 5 degrees, at Charlotte Pass, Mount Kosciusko, on 5th September.

Wind.—The greatest wind velocity recorded in Sydney was 68 miles per hour from the south on the 6th July. Many other strong blows, however, were experienced, storm force was also recorded on the 8th November, when 64 miles per hour from the south-west was registered.

The following is a resumé of the weather conditions prevailing in each month of the year :—

January.—Very changeable weather was a feature of this month. Heat wave conditions prevailed in the second week, but the second half of the month was characterised by alternate hot and cool spells. The rainfall was generally below normal, but thunderstorms were unusually frequent. The highest temperature reported was 112 degrees at Mungindi on the 13th, and the lowest, 25 degrees, at Kiandra on the 20th.

February.—February was noteworthy for the floods in North Coastal rivers. Incessant heavy rain continued on the North Coast for eight days, whilst severe easterly gales raged for ten days. Elsewhere over the State the month was on the dry side and mostly warm to hot. A pronounced cold snap on the 20th, however, resulted in frosts on the Tablelands, and snow on parts of the Southern and Central Highlands, both most unusual occurrences for February. The highest temperature was 111 degrees at White Cliffs on the 18th and the lowest, 21 degrees, at Kiandra on the 23rd.

March.—Abundant rain fell in all divisions with monthly totals above average practically throughout the State. On parts of the North-west Slopes and Plains the month was the wettest on record. Floods occurred in various localities. On the 21st a severe cyclone caused strong south-westerly gales, heavy rain, hail and snow in south-east Australia.

The month was very sultry and humid. The highest temperature recorded was 104 degrees at Coonamble on the 1st, and the lowest, 27 degrees, at Charlotte Pass on the 23rd.

April.—Record monthly rainfalls for April were recorded at many stations in the far West and on the Central Coast. The month was cool, the highest temperature being 91 degrees at Tibooburra and White Cliffs on the 13th, and the lowest, 21 degrees, at Kosciusko on the 9th. Snow fell on the Southern Highlands on the 7th and 8th.

No. 104.—Meteorological Conditions, New South Wales, 1931—*continued.*

May.—Very wet conditions continued during May over all inland districts. In coastal districts, however, the rain was lighter and in parts below normal. The first half of the month was exceptionally mild but the latter half was cold with severe frosts.

The highest temperature was 89 degrees at Grafton on the 11th, and the lowest, 13 degrees, at Charlotte Pass on the 26th.

June.—Extensive floods, probably the heaviest in the history of the State, occurred during June. Practically all inland river systems were affected. Frequent widespread rainstorms occurred and the monthly totals were far above average in all inland districts. On the coast and adjacent areas, however, the rainfall was considerably below normal. Frosts were less severe than usual, but fogs were unusually prevalent, and numerous snowstorms occurred on the Southern Highlands.

The highest temperature recorded was 85 degrees at Grafton on the 11th and 12th, and the lowest, 13 degrees, at Charlotte Pass on the 4th. On the 11th the maximum temperature at Sydney—80·4 degrees—was the highest on record for June.

July.—The excessively wet conditions of the previous four months were relieved by prolonged fine spells. One of the most severe cyclones on record occurred on the Central Coast on the 6th and 7th of the month. At the Weather Bureau velocities up to 68 miles per hour were recorded, and the rainfall in the Metropolitan area averaged about 10 inches in 48 hours.

Several severe cold snaps were experienced during the month. Snow was frequent on the Southern Highlands, and extended to the Central and Northern Highlands. Frosts were severe in third week.

The highest temperature recorded was 88 degrees at Grafton on the 27th, and the lowest, 6 degrees, at Kiandra, on the 14th.

August.—August was a comparatively dry month, the rainfall generally being below the average. Southern storms were frequent, and westerly gales prevailed over all Southern Waters. Snowstorms were frequent on the Southern Highlands and extended to the Central Tablelands. Frosts were numerous and at times severe. The highest temperature recorded was 82 degrees at Lismore on the 11th, at Grafton on the 16th, and at Bourke on the 27th, the lowest temperature was 6 degrees at Kiandra on the 25th.

September.—Although the month was mainly mild, several severe cold snaps occurred and temperatures were very variable. On the 4th a heavy snowstorm was experienced in the Bowral district, with lighter falls over the Southern and Central Tablelands. Heat wave conditions prevailed on the 24th, when 90 degrees and over were recorded at many places. The rainfall was below normal, but generally sufficient except in the North Coastal districts where rain was badly needed. The highest temperature was 99 degrees at Grafton on the 25th, and the lowest, 5 degrees, at Charlotte Pass on the 5th.

October.—October was dry and cool. In all divisions the average rainfall was below normal, the shortage being most marked in the West and on parts of the Coast. Most areas, however, received sufficient rainfall for requirements. Frosts were numerous and on occasions severe in inland areas. Between the 17th and 19th a heavy snowstorm occurred on the Southern Highlands. Thunderstorms were frequent.

The highest temperature recorded was 102 degrees at Bourke on the 29th, and the lowest, 17 degrees, at Kiandra on the 20th.

November.—Excellent rains fell over most of the State during November. Late crops benefitted considerably, but in isolated localities considerable damage was caused by hail. Thunderstorms were unusually frequent, and at times severe.

Although conditions were sultry, there was an absence of prolonged excessive heat during the month. The highest temperature was 106 degrees at White Cliffs on the 27th, and the lowest, 21 degrees, at Charlotte Pass, Mount Kosciusko, on the 21st.

December.—Persistent rain fell over Northern and Coastal areas during the first ten days with heavy falls on the Northern and Central Slopes, Highlands and Coast. The second half of the month was generally fine with gradually rising temperatures, culminating in a severe heat wave over inland areas during the last week.

The highest temperature recorded was 113 degrees at White Cliffs on the 29th and 30th, and the lowest, 23 degrees, at Charlotte Pass on the 14th and 23rd.

No. 105.—Monthly Rainfall, 1912-1931—Representative Stations in Divisions.

NOTE.—For monthly rainfalls at Representative Stations from the earliest date available in each case to 1906 see Statistical Register, 1924-25. In table No. 108 the average annual rainfall, over a period of years, is given at a number of stations.

NOTE.—(—) Denotes no record, and (...) no rainfall during the month.

NOTE.—The figures quoted for 1841 and subsequent years represent the population of New South Wales within its boundaries after the separation of Queensland. Victoria was separated from New South Wales on the 1st July, 1851, and Queensland on the 10th December, 1859. The Federal Capital area of Yass-Canberra was transferred to the Commonwealth on 1st January, 1911.

Aborigines are included in the totals for the last six Censuses. The numbers included were 983 in 1871, 1,645 in 1881, 8,280 in 1891, 4,287 in 1901, 2,012 (of whom 10 were in the Federal Capital area) in 1911, and 1,597 (M. 923, F. 674) in 1921.

* The population of the Federal Capital area (997 males, 727 females, 1,724 persons) is excluded.

NOTE.—From the records of the 1861 Census, the ports at which ships were lying are not available, so that the shipping population of Sydney cannot be ascertained. The total shipping population was 1,910 (males 1,842, females 68), and two-thirds of that number have been assumed to have been in Sydney Harbour, and are included above.

Aborigines are included in the totals for the last six censuses.

* The Suburbs in 1921 comprised 40 Municipalities and Ku-ring-gai Shire.

Section II.—VITAL STATISTICS.

NOTE.—From the beginning of 1927, deaths have been allocated to the locality in which the deceased permanently resided, when known, and births to the usual place of residence of the mother; consequently in this issue comparisons of these figures for any division cannot be made with those or years prior to 1927.

From the beginning of 1929 the Municipalities of Auburn, Bankstown, Granville, Lidcombe and Parramatta have been included in the Metropolis, consequently the figures for the Metropolis for 1929 and subsequent years cannot be compared with those of previous years.
